EDUCATION

Bachelor of Technology - Artificial Intelligence & Machine Learning

Kamala Institute of Technology & Science, Huzurabad

Expected Graduation: 2027

CGPA: 7.2/10

Relevant Coursework: Data Structures, Algorithms, Machine Learning, Databases, Cloud Computing, Cybersecurity

TECHNICAL SKILLS

Programming Languages: Python, Java, C

AI/ML & Data: Machine Learning, Generative AI, Data Pipelines, ETL, Model Training

Web Technologies: HTML5, CSS3, JavaScript, REST APIs, Full-Stack Development

Cloud & Security: AWS, Google Cloud, Microsoft Azure (Learning), Ethical Hacking, Cybersecurity

Databases: SQL, MySQL, Supabase, Database Design

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Agile Methodologies

VIRTUAL INTERNSHIPS

AI-ML Virtual Intern | Google for Developers (India Edu Program)

AICTE-EduSkills | April 2025 - June 2025 | 10 Weeks

- Completed comprehensive training in Artificial Intelligence and Machine Learning fundamentals
- Implemented ML models using Python libraries including scikit-learn and TensorFlow
- Gained hands-on experience with data preprocessing, model training, and evaluation techniques

Generative AI Virtual Intern | Google Cloud

AICTE-EduSkills | January 2025 - March 2025 | 10 Weeks

- Learned Generative AI concepts including LLMs, prompt engineering, and AI application development
- Explored Google Cloud AI services and cloud-based ML model deployment
- Built AI-powered applications leveraging pre-trained models and APIs

Ethical Hacking Virtual Intern | EduSkills Academy

AICTE-EduSkills | October 2024 - December 2024 | 10 Weeks

- Studied cybersecurity fundamentals including network security and vulnerability assessment
- Learned penetration testing methodologies and security best practices
- Gained understanding of secure coding practices and threat mitigation strategies

Data Engineering Virtual Intern | AWS Academy

Remote | 10 Weeks

- Designed and implemented end-to-end data pipelines using AWS services for large-scale dataset processing
- Built ETL workflows for data ingestion, transformation, and loading into cloud storage solutions
- Applied cloud-native data engineering practices with focus on scalability and performance optimization

PROJECTS

Digital Time Capsule - Full-Stack Web Application

Technologies: HTML, CSS, JavaScript, SQL, Supabase

- Developed responsive platform for time-scheduled message and file storage with real-time features
- Implemented secure user authentication and database management using Supabase backend

Portfolio Website - projectsnavadeep.in

Technologies: HTML5, CSS3, JavaScript

- Built modern, responsive personal portfolio showcasing technical projects and achievements

NRCM Hackathon - ReportGenerator.in

Technologies: Python, Web Technologies

- Developed automation tool for generating structured reports from user inputs under tight deadlines
- Achieved Top 40 ranking among all participants; demonstrated rapid prototyping skills

CERTIFICATIONS & ACHIEVEMENTS

- AI-ML Virtual Internship Certificate - Google for Developers (AICTE-EduSkills)
- Generative AI Virtual Internship Certificate - Google Cloud (AICTE-EduSkills)
- Ethical Hacking Virtual Internship Certificate - EduSkills Academy (AICTE-EduSkills)
- AWS Academy Data Engineering Virtual Internship Certificate
- Top 40 Participant - Hackathon at NRCM (Narsimha Reddy Engineering College)
